

NIHAR RANJAN BISWAL

Full Stack Developer | Java & Python Developer | AI/ML Enthusiast | Data Analyst

Bhubaneswar, Odisha, India | +91 9556637112 | niharranjanbiswal22@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Final-year MCA candidate (2026) and Full Stack Developer with hands-on experience building production-style web applications using React.js, Next.js, Node.js, and MongoDB during an active internship at NIELIT. Skilled in Java, Python, C/C++, and SQL, with applied exposure to machine learning (Pandas, NumPy, Scikit-learn) through independent AI projects. Strong foundation in data structures, REST API design, and database operations (CRUD), combined with growing cloud fundamentals (Oracle Cloud Infrastructure). Known for turning ambiguous problems into clean, well-documented, working software. Seeking an entry-level Software Developer / Full Stack Developer / Data Analyst role to apply strong analytical thinking and full-stack engineering skills.

TECHNICAL SKILLS

- **Languages:** Java, Python, C, C++, JavaScript, SQL
- **Full Stack Development:** React.js, Next.js, Node.js, Express.js, REST APIs, HTML5, CSS3, MongoDB, CRUD Operations
- **Data & AI/ML:** Pandas, NumPy, Scikit-learn, Data Preprocessing, Model Training & Evaluation, Data Analysis
- **Databases & Tools:** MongoDB, SQL, Git, GitHub, GitHub Pages, Postman, VS Code
- **Cloud & Infrastructure:** Oracle Cloud Infrastructure (OCI) Fundamentals, Cloud Computing Concepts, Networking (LTE, IP Routing, Network Simulation), System Troubleshooting
- **Core Competencies:** Data Structures & Algorithms, Critical Thinking, Mathematical Modeling, Technical Documentation, Analytical Problem-Solving

EXPERIENCE

Full Stack Developer Intern — National Institute of Electronics & Information Technology (NIELIT)

February 2026 – Present

- Developed and deployed full-stack web applications using React.js, Next.js, Node.js, and MongoDB, gaining hands-on exposure to application deployment and environment configuration.
- Engineered front-end components and back-end REST APIs, implementing complete CRUD workflows for real-time data operations.
- Collaborated with a cross-functional technical team to debug, test, and document application features, applying structured problem-solving and clear technical writing.
- Practiced version control with Git/GitHub across the development lifecycle, strengthening deployment and release workflows foundational to modern software teams.

PROJECTS

AI IPL Match Predictor Website

- Built a full-stack React.js + Node.js web application to predict IPL match outcomes using historical data, with CRUD operations and real-time data updates.

Disease Detection AI Model

- Designed a machine learning pipeline in Python to predict disease risk from healthcare datasets, handling data preprocessing, feature engineering, model training, and evaluation using Pandas, NumPy, and Scikit-learn.

Online Examination & Result Management System

- Developed a web-based examination platform enabling students to take online tests and view results instantly, with secure user authentication and automated result processing.

EDUCATION

Master of Computer Applications (MCA) — Pursuing | Maharaja Sriram Chandra Bhanja Deo University | Aug 2024 – Apr 2026

B.Sc. Physics — 72.40% | Utkal University | 2020 – 2023

CORE STRENGTHS

- Clear, concise verbal and written communication that strengthens teamwork and client relationships.
- Fast learner with a proactive approach to adopting new technologies, frameworks, and platforms.
